

Nepalaya Books

User Manual

How to receive print runs, move cartons, put books on sale, sell at the counter, and troubleshoot common issues — written for Cashier, Warehouse, and Admin roles.

Product: Nepalaya Books (Publishing Operations)

Audience: Store & warehouse staff (3–5 people)

Training goal: Productive in under one hour; fluent in one day

Version: July 2026

1. What this system is

Nepalaya Books is the operating system for Nepalaya Publication after books leave the printer. It tracks where every copy is, moves stock between Main Warehouse → Backroom → Bookstore Floor, and sells only from Bookstore Floor stock through the Point of Sale (POS).

It is **not** a full ERP or general warehouse product. It is built to feel like Square POS + a simple warehouse app.

Core rule

Every physical copy lives in exactly one place. Stock always *moves*. It never duplicates. If POS shows 0, the book cannot be sold — even if the warehouse is full.

Three locations

Location	Purpose	Typical work
Main Warehouse	Long-term storage of print runs	Receive, label cartons, store, send to Backroom
Backroom	Buffer next to the shop	Receive transfers, open cartons, put on sale
Bookstore Floor	Retail shelf stock (POS only)	Sell, return, shelf adjustments

Cartons (boxes)

A carton holds copies of **one title** and has a barcode like `NPBX-PW-000042`.

Status (on screen)	Meaning
Full	Sealed carton, not opened
Open	Partially used / remainder carton
Empty	No copies left in the carton
In transit	On a transfer between locations

2. Roles at a glance

Your login decides what menus you see. Ask Admin if you need a different role.

Cashier — Front of house

Dashboard (read), Books (browse), Scan, Store POS, own Account settings. Cannot receive print runs, create transfers, or manage users.

Warehouse (system role: admin) — Ops floor

Everything Cashier can do, plus Receive, Transfers, Cartons, Cycle count, Locations, Reports, Discounts, Locations setup.

Admin (system role: superadmin) — Full control

Everything Warehouse can do, plus Staff accounts (create users, reset passwords, change roles), full analytics / audit.

Task	Cashier	Warehouse	Admin
Sell books (POS)	✓	✓	✓
Process returns	✓	✓	✓
Scan cartons / put on sale*	Scan view	✓	✓
Receive print run	—	✓	✓
Send / receive transfers	—	✓	✓
Cycle count	—	✓	✓
Reports	—	✓	✓
Manage staff & passwords	—	—	✓

* Put on sale and warehouse mutations require Warehouse or Admin access.

3. The big picture (stock flow)

```
Printer
  ↓ Receive (create Full + Open cartons, print labels)
Main Warehouse
  ↓ Transfer → Send
Backroom
  ↓ Transfer → Receive, then Put on sale
Bookstore Floor
  ↓ POS sale
Customer
```

Happy path (one print run)

- 1 **Receive** at Main Warehouse — choose book, total qty, copies per carton → create cartons → print labels → stick on boxes.
- 2 **Send** cartons Main Warehouse → Backroom (scan cartons, tap Send).
- 3 **Receive** the transfer at Backroom.
- 4 **Put on sale** — scan carton, move N copies to Bookstore Floor.
- 5 **Sell** on Store POS (only Bookstore Floor stock appears).

4. Getting started

Sign in

1. Open the Nepalaya Books web app (desktop or tablet; Chrome / Safari recommended).
2. Enter the email and password provided by Admin.
3. If login fails: check Caps Lock, ask Admin to reset your password, or use “Forgot password” if enabled.

Camera scanning needs HTTPS (or localhost). On the phone/tablet, allow camera permission when asked.

Navigation

- **Desktop:** left sidebar — Dashboard, Books, Warehouse tools, Store POS, Reports, Settings.
- **Phone/tablet:** bottom tabs for the most common actions (Sell / Scan / Home, etc.).
- Press  anytime to reopen the in-app help guide.

First-time tip

Complete one small loop with a supervisor: Receive a tiny qty → Send → Receive → Put on sale → make a test sale (and void/return if needed). That teaches 90% of the product.

5. Cashier guide

Your job: serve customers quickly and keep Bookstore Floor stock accurate.

5.1 Open Store POS

- 1 Go to **Store POS**.
- 2 Search by title, author, or ISBN. Only books with Bookstore Floor stock are sellable.
- 3 Tap a book to add it to the cart. Adjust quantity with + / –.
- 4 Optional: add customer phone/name, apply discount if allowed.
- 5 Tap checkout → choose payment (cash / card / eSewa / Khalti as configured) → confirm.
- 6 On success, use **Next sale** to clear and serve the next customer. Print receipt if needed.

5.2 Returns

1. In POS, open **Process Return**.
2. Search by customer phone.
3. Select the sale, choose quantities to return, enter a **reason** (required).
4. Confirm — stock returns to Bookstore Floor; refund amount is recorded.

5.3 Close shift

Use **Close shift** when your shift ends. Confirm the day's totals shown in the dialog before closing.

5.4 What Cashiers should not do

- Do not invent stock — if POS says out of stock, ask Warehouse to **Put on sale**.
- Do not receive print runs or create warehouse transfers.

5.5 Cashier troubleshooting

Problem	Solution
Book missing in POS	Check Bookstore Floor stock (Books detail). Ask Warehouse to put on sale from a carton.
“Max stock reached”	You already have all available floor units in the cart.
Sale failed after payment	Do not tap Pay again with a new cart. Refresh, check if the sale appears. Contact Admin — retries are safe (idempotent).
Wrong price	Ask Admin/Warehouse to update the book MRP in Books → Manage.
Forgot password	Ask Admin → Settings → Staff accounts → Reset password or Email reset.

6. Warehouse guide

Your job: keep cartons labeled, moves honest, and the shop floor stocked.

6.1 Receive a print run

Menu: **Warehouse** → **Receive**

- 1 Confirm location is **Main Warehouse** (default).
- 2 Search and select the book.
- 3 Enter **total copies** and **copies per carton**. Preview shows how many Full vs Open cartons will be created.
- 4 Optional: batch ref, shelf, notes.
- 5 Tap **Receive & create cartons**.
- 6 On success: **Print labels** (stick them on), or **Send these cartons** to open Transfers with boxes preselected, or Done.

Remainder copies (not a full carton) become an **Open** carton automatically — still label it.

6.2 Send a transfer (Main → Backroom)

Menu: **Warehouse** → **Transfers**

- 1 Tap New transfer. From = Main Warehouse, To = Backroom (defaults).
- 2 Scan cartons (camera or USB/type). Remove mistakes from the list.
- 3 Primary action: **Send** — creates the transfer and ships immediately.
- 4 Use **Save draft** only if you must pause mid-scan.

After Send, cartons are **In transit**. Someone at the destination must **Receive** them.

6.3 Receive a transfer

1. Open Transfers → find status **Sent**.
2. Confirm cartons physically arrived.
3. Tap **Receive**. Cartons now sit at the destination location.

6.4 Put on sale (Backroom / warehouse → Bookstore Floor)

Menu: **Scan** (fastest) or Cartons / Book detail

- 1 Open camera or type/USB-scan the carton barcode.
- 2 Tap **Put on sale**, enter quantity (default = full remaining).
- 3 Confirm. Copies move to Bookstore Floor; carton becomes Open or Empty.
- 4 Scanner clears for the next carton — keep going.

6.5 Cartons list

Menu: **Warehouse** → **Cartons**. Default filter is **All warehouses**. Filter by status/location, multi-select to print labels or export.

6.6 Cycle count

Menu: **Warehouse** → **Cycle count**

1. New count → choose location and method.
2. Enter counted quantities.
3. Complete — system adjusts inventory for differences (audit recorded).

Only complete a count when physical counting is finished. Cancelling discards entered counts.

6.7 Shelf locations

Define aisle/rack/bin codes, then use Scan → Set shelf (put-away) so cartons are findable.

6.8 Warehouse troubleshooting

Problem	Solution
Carton “already in transit”	Open Transfers → Receive at destination. Do not create a second transfer for the same carton.
Stuck draft transfer (>24h)	Dashboard warns you — open Transfers, Send or Cancel the draft.
Camera won’t scan	Use HTTPS; allow camera; good light; hold steady. Or type / USB wedge scanner into the box code field.
Shop out of stock but warehouse full	Put on sale from Backroom/Main cartons — POS only sees Bookstore Floor.
Label won’t print	Allow pop-ups for the site; retry Print labels from Receive success or Cartons.

7. Admin guide

Your job: keep people, prices, and permissions healthy — and unblock the team.

7.1 Staff accounts

Menu: **Settings** → **Staff accounts**

- **Add user** — name, email, temporary password, role (Cashier / Warehouse / Admin).
- **Reset password** — set a temp password; share securely (shown only once in the dialog).
- **Email** — send a password reset email when email auth is configured.
- **Change role** — promote/demote staff.
- **Activate / Deactivate** — deactivated users cannot sign in.

Never reset or deactivate your own Admin account without another Admin available.

7.2 Books catalog

Books → **Manage** — create/edit titles, MRP, cost, ISBN, min stock alerts. Soft-delete carefully.

7.3 Discounts & locations

- Settings → Discounts — store rules for POS.
- Settings → Locations setup — Main Warehouse / Backroom / Bookstore Floor.
- Warehouse → Locations — shelf bins.

7.4 Reports & audit

- **Reports** — sales, inventory value, low stock, warehouse activity.
- **Staff accounts** → **Analytics / Sales / Audit** — deeper history, voids, who did what.

7.5 Voiding a sale

From Admin sales tools: void with a written reason. Voided sales should not remain in revenue totals.

7.6 Admin troubleshooting

Problem	Solution
Staff locked out	Reset password or reactivate profile.
“You don’t have access”	Wrong role — change role or open the correct menu.
Preview/login white screen	Ensure Vercel has Supabase env vars; hard-refresh.
Numbers look wrong after a bad receive	Use cycle count or supervised stock adjustment; check audit log.

8. Feature reference

Screen	What it does
Dashboard	Today's sales, pending transfers, low floor stock, stuck drafts, next actions
Books	Catalog hub; open a title for stock by location, cartons, history
Receive	Create cartons from a print run; print labels; jump to Send
Transfers	Send / Receive carton moves between locations
Cartons	Search/filter all boxes; print; put on sale
Scan	Camera/USB barcode → put on sale, send, set shelf, print
Cycle count	Physical count vs system; apply adjustments
Store POS	Sell, return, shift close
Reports	Inventory & sales reporting for managers
Settings	Account, discounts, staff, locations

9. Daily / weekly checklists

Opening (Cashier)

- ☐ Sign in
- ☐ Confirm POS loads and a few titles show stock
- ☐ If shelves look empty, ping Warehouse before the rush

During the day (Warehouse)

- ☐ Clear any **Sent** transfers waiting to Receive
- ☐ Put on sale enough copies for the floor
- ☐ Receive any new print runs and label cartons the same day

Closing (Cashier)

- ☐ Close shift with confirmed totals
- ☐ Sign out on shared tablets

Weekly (Admin / Warehouse)

- ☐ Review low-stock and reprint candidates in Reports
- ☐ Spot-check cycle count on one shelf or one title
- ☐ Deactivate former staff accounts

10. Troubleshooting & solutions

Login & access

Symptom	Fix
Incorrect email/password	Retry carefully; Admin reset password
Account deactivated	Admin must reactivate
Redirected from a page	Role lacks permission — toast explains

Scanning

Symptom	Fix
Camera permission denied	Site settings → Allow camera → Try again
Won't decode	Better light, fill the frame, clean lens; or type the code
"No box found"	Confirm label matches system barcode; check Cartons list

Stock & sales

Symptom	Fix
Insufficient stock error	Refresh; verify location qty; don't force negative stock
Double-tap created one sale only	Expected — system uses request IDs to prevent doubles
Return rejected	Reason required; sale may already be fully returned

If something goes wrong mid-flow

Stop and check status before repeating the action. Carton already Sent → Receive it. Sale maybe recorded → check Sales / Reports. Repeating a finished step often fails with a clear message — read it.

11. Glossary

Term	Meaning
Carton / Box	Physical package of one title with a barcode
Put on sale	Move copies from a carton location onto Bookstore Floor
Send	Ship a transfer (cartons leave source, status In transit)
Receive (transfer)	Accept in-transit cartons at destination
Receive (print run)	Create new cartons when books arrive from the printer
Bookstore Floor	Only stock POS can sell
MRP	Maximum retail price / selling price on the book
Cycle count	Physical inventory count reconciled to the system
Audit log	Who did what, when (Admin can review)

12. Keyboard shortcuts (desktop)

Keys	Action
 ?	Open help guide
 G then  H	Dashboard
 G then  B	Books
 G then  S	Scan
 G then  R	Receive
 G then  M	Transfers
 G then  P	Store POS
 Esc	Close camera / modals
